

Here at Butlers Nursery we propagate and grow on, a wide variety and selection of wholesale plants which are distributed all over New Zealand – so strong healthy plants being delivered to our customers is paramount. Since using Superzyme from Roots, Shoots & Fruits Ltd in our nursery program we have noticed a dramatic reduction in plant failure rates and a noticeable improvement in plant quality. We are really pleased with the results and it's so easy to use.

We will be continuing to use Superzyme and other products from the Roots, Shoots and Fruits range for the foreseeable future.
